Technologies and Languages

- Languages: JavaScript, TypeScript, Python, Golang, HTML, CSS
- Technologies: React, GraphQL, AWS, GCP, PostgreSQL, Docker, Next.js, Jest, Terraform, Node
- Interests: Rust, robotics, AI, blockchain, security, microservices, CI/CD

Work Experience

Studio 2021 - Current
Senior Software Engineer Remote

- Led frontend performance initiative that resulted in 3x improvement in Lighthouse scores
- Strengthened security posture by adopting AWS Secrets Manager and patching security vulnerabilities
- Decreased AWS spend by 40% while automating backend deployments and implementing autoscaling
- Led full stack development of multiple features, including a rich text editor, video thumbnails, and a CLI tool
- Improved error handling to capture thousands of lost conversions due to insufficient fund errors

Bard 2020 - 2021
Software Engineer / Technical Co-Founder Remote

- Took MVP from ideation to completion in 6 weeks built with React, Firebase, and Google Cloud
- Designed, developed, and deployed a full stack application serving ~50+ daily active users

Cisco 2018 - 2020
Software Engineer Remote

- Accelerated builds by ~25% and shrunk bundle size by ~13% by enhancing React framework
- Improved security posture by implementing static analysis in Jenkins CI/CD for all team repositories
- Performed load testing that led to ~4% decrease in SQL DB latency and 25x better average response time
- Maintained documentation enabling customers to onboard to our Go microservice themselves
- Increased Go microservice speed by ~84% using Go's performance tools
- Increased sprint velocity by 12% by introducing new processes as Scrum Master

Finn AI 2017 - 2018
Software Engineer Vancouver, BC

- Managed a team of 3 developers while building a React CMS enabling self-service for customers
- Reduced deployment time by 80% by implementing the first automated CI/CD pipeline
- Improved data scientist iteration time by ~10% by improving Python and Postgres tooling

Fitplan 2016 - 2017
Frontend Software Engineer Vancouver, BC

- Collaborated with the design team to rebuild the website with a modern, refreshed design
- Built analytics platform using Node and React for 40+ athletes to track the performance of their plans
- Launched Stripe implementation that captured over \$5000 per month via the website

Projects and Volunteering

- **STX Me** - Easily donate STX tokens to website owners; winner of Stacks Grant
- **Social Media Death Clock** - Chrome extension built to limit social media use; featured on SkyNews
- **Canada Learning Code** - Lead and instructed multiple workshops teaching women and kids how to code

Education

- **Blockchain Bootcamp**, 7 Gate Academy 2019
- **Fullstack Software Engineering Bootcamp**, Lighthouse Labs 2016
- **Ontario Institute of Audio Recording Technology**, Audio Engineering, Honours 2013 - 2014
