Technologies and Languages

•	Languages:	JavaScript,	TypeScript,	HTML,	CSS; interest	in Rust and G	0
---	------------	-------------	-------------	-------	---------------	---------------	---

• Technologies: React, GraphQL, AWS, GCP, Postgres, Docker, Next.js; interest in robotics, AI, blockchain

Education

•	Associate's Degree, Computer Science, Langara, Dean's Honour Roll	Sept 2020 - Curren	
•	Blockchain Bootcamp, 7 Gate Academy	2019	
•	Full Stack Software Development Bootcamp, Lighthouse Labs	2016	
•	Ontario Institute of Audio Recording Technology, Audio Engineering, Honours	2013 - 2014	

Work Experience

Bard Mar 2020 - Oct 2020 Software Engineer / Co-Founder Remote

- Took MVP from idea to successful completion in 6 weeks built with React, Firebase, and Google Cloud
- Designed, developed, and deployed full stack application serving ~50+ unique users a day

Cisco 2018 - 2020 Software Engineer Remote

- Enhanced our React framework to have ~25% faster and ~13% smaller builds
- Improved security posture by implementing static analysis in Jenkins CI/CD for all team repositories
- Performed load testing that lead to ~4% decrease in SQL DB latency and 25x better average response time
- Presented to 20+ engineers during lunch and learn about Terraform best practices
- Maintained documentation enabling customers to onboard to our Go microservice themselves
- Increased performance of golang microservice by ~84% using Go's performance tools
- Introduced new sprint processes as the Scrum Master leading to 12% better sprint velocity
- Managed and maintained infrastructure in Amazon Web Service with Terraform

Finn AI 2017 - 2018
Software Engineer Vancouver, BC

- Managed team of 3 developers while building a CMS with React enabling self-service for customers
- Proposed and advocated for the use of microservices to improve developer processes
- Reduced deployment time by 80% by implementing first automated CI/CD pipeline
- Improved data scientist iteration time by ~10% by improving Python and Postgres tooling

Fitplan 2016 - 2017 Web Developer Vancouver, BC

- Collaborated with design team to rebuild website with a modern, refreshed design
- Built analytics platform using Node and React for 40+ athletes to track performance of their fitness plans
- Launched Stripe implementation that captured over \$5000 per month via website

Projects and Volunteer Work

- Wrabit Platform for mental health. Built with React, Firebase, and hosted on Google Cloud. Donated ~\$500 to mental health research on behalf of users.
- **Social Media Death Clock** Chrome extension built to limit social media use. Resulted in an interview on SkyNews.
- Canada Learning Code Lead and instructed workshops teaching ladies and kids how to code.
